Dear Parent,

The school has reopened for students after a long summer vacation and it is a pleasure to see our children refreshed and rejuvenated after the break!

A number of infrastructural changes have been initiated to improve our facilities in order to accommodate our students better and thus further raise the level of education!

The top floor has been made functional for extra space. Work is currently in progress to provide our children with another Computer laboratory, Senior Library, Basketball and Badminton courts in the basement, CCTV installations, GPS tracking system in school transport and Smart Boards. A Female Swimming Coach has been hired in addition to other faculty members.

The faith, trust and support extended by our parents are admirable and this, in turn, has led us to achieve many milestones in the last academic year.

1. The school was accorded with a 17th rank in the list of elite schools of Gurgaon in a survey conducted by ‘C fore in The Education World Magazine’.
2. We achieved the 4th rank in the Innovator category by the ‘Times of India Survey’ and the 7th rank by ‘Digital World’.
3. We also received The British Council International School Award for the period 2015-18.

As for the way forward, we would be participating in a number of International Projects this year. The school has already enrolled for the ‘School Enterprise Challenge’. This competition is open to all formal educational institutes in all countries around the world. The competition requires students to ‘plan and launch a profitable business which also creates a positive social and environmental impact’. This makes running a business a much more ‘realistic experience’ and helps to prepare students for the world of work. It also means that the business can act as a ‘source of income’ while being a ‘learning resource’ for students. This competition has been recognized for its excellence and innovation.

As always, we expect the strong support of our parent community to make this venture successful. The students will be creating a number of exciting and useful articles from waste products (especially e-waste). The students will also put up stalls of refreshing soft drinks and snacks during the breaks, dispersal and PFMs. We urge our parent community to encourage, support and participate in this collaborative initiative wholeheartedly!

Kind regards
