Dear Parent

In order to improve our system, The Maurya School has changed the GPS vendor for our school transport. The new vendor is Mtap Technologies. Kindly download the Safetrax parent app from the playstore to monitor and know the exact location of the school vehicle of your ward.

The school has also procured 35 sim cards and cell phones and have installed the GPS application in them. You are requested to make a note of the phone number pertaining to the route number of your ward which will not change for that route.

Link to download the app is given below:

Kind Regards

Shalim Bajaj
Head of the School
